## Printing Tips

For bed adhesion we strongly recommend printing with a brim of 4 mm or greater.

Every printer is different but in general here are the main settings to pay attention to:

- Brim ON
- Support Material OFF (all our parts have built in support).
- Layer Height of .2mm or less
- Retraction amount and speed
- Acceleration and jerk settings
- Overall Print speed

## Notes

**Scaling down:** To print at 15mm scale reduce all pieces by 50%

Please note that some aspects might not work at this scale. Also some details may not come out and will need to be cleaned.

**Assembling:** According to the accuracy of your printers some pieces might need to be filed down or trimmed with a hobby knife.
